

READ THE INSTRUCTIONS CAREFULLY BEFORE TAKING PICTURES!

PREPARATION:

1. Print out the reference quadrangle (attachment file: ReferenceA3 or ReferenceA4) and the Made to Measure -chart for the assistance measures (attachment file: measure chart)

2. Prepare the photoshoot area:

- Tape the reference quadrangle carefully on a hard surface. The edges of the reference quadrangle have to be visible in the photo so the color of the surface has to differ from the reference quadrangle

- A straight line must be visible at the **edge** of the photo, for the line you can hang a rope or a string from the ceiling or the wall.

The color of the line should differ from the color of the background. A door frame or wall corners may **not** be used as a straight line

- The photographed person should be wearing close fitting clothes (e.g. leggings and skintight shirt). Preferably sleeveless and no dark colors. To create a clear profile use an elastic band at the waist and under chest level (check the pictures on page 3)

- Watch has to be removed for the photoshoot

- Neck line should be visible so long hair has to be tied up. Face may be covered

- No shoes

- Camera resolution has to be atleast 7 megapixels

- Set the camera 11,5 feet (3,5m) appart directly in front of the photographed person

- Set the camera on the tripod just above the navel level (approx. 4 inches)

- The camera should be set on a tripod, position must be the same in all three photos

Reference quadrangle

PHOTOGRAPHING:

- The photographed stands exactly on the centre of the reference quadrangle. All corners of the quadrangle must be visible
- The straight line must be visible at the **edge** of the photo
- The photographed should stand in a natural manner
- Do not use zoom!

1. Front view:

- The photographed should stand in a natural manner, hands apart from thighs

2. Side view

- First side view: Photographed should stand the same way as in the front view
- Second side view: arms crossed so that the back line is visible
- NOTE! Be sure that no part of the far side is visible (e.g. only the foremost leg should be visible!)

1. Hands about 7,5 inch (20cm) aside the thighs

2. Hands the same way as in photo 1.

3. Arms crossed so that the back and crotch side view are visible

PHOTOGRAPHING INSTRUCTIONS FOR MTM SUITS

RESULT:

- Make sure that the reference quadrangle, the photographed and the straight line are all visible in the photo
- Be sure that the photo is focused
- Save and send the photos **without downsampling**

TAKE THE ADDITIONAL MEASUREMENTS AS REQUESTED ON THE MEASURE CHART!

A hanging string used
as a straight line
